## **NOTES:**

- The spreadsheet with products list shows All Item codes, Sizes, Brand, Product type, Colours and Prices as per each item code.
- You will find some item codes repeated. This is because of differential pricing on the basis of sizes. You will find this mainly with items having sizes from 3XL upwards or even 2XL upwards. Please reflect the same differential pricing on the item listings.
- If the pricing is differential due to colour code (White items cheaper than Colour, please use the price for Coloured item for all items including White)
